

CULTURE, SCHOOL AND CREATIVE EDUCATION RESEARCH GROUP

Universidade do Vale do Itajaí (UNIVALI)

Pesquisadores: Adair de Aguiar Neitzel, Isleide Steil, Mônica Zewe Uriarte

Contato do grupo: neitzel@univali.br

Área: Ciências Humanas

Linhas de Pesquisa: Culture; Technology; Learning

Breve descrição das atividades de pesquisa

The Research Group “Culture, School and Creative Education” was created in 2008 with the aim of investigating how culture, art and aesthetic education contribute to human development. The group develops its researches around two thematic axes: cultural mediation and aesthetic education, in formal and non-formal education environments, such as: schools, hospitals, museums, libraries, “bebetecas” and universities. In addition to research activities, the group promotes extension projects about aesthetic education through art, cultural events, cultural study missions, scientific events and training courses for teachers in educational networks.

The group develops research with the universities: Paris I (Institut ACTE -Arts, Créations, Théories, Esthétiques), Paris VII (Laboratoire de Changement Social et Politique – LCSP), University of the Region of Blumenau (FURB- Research Group Art and Aesthetics in Education), University of the Region of Joinville (UNIVILLE-NUPAE and PROLER UNIVILLE), Mackenzie Presbyterian University (GPAP - Art in Pedagogy and GPeMC - Cultural Mediation: contaminations and aesthetic provocations) and University of Caxias do Sul (Observatory Group for Reading and Literature - OLLI).

The group offers one seminar per semester on the themes that promote research. We collaborated in the organization of the Guidelines for the Municipal System of School Libraries of Itajaí/SC (2018-2019) and in the evaluation system promoted by Literary PNLD (National Literary Textbook Plan - Ministry of Education and Culture) in the years 2021 to 2023.

Impacto das pesquisas desenvolvidas para a sociedade e ciência

Impact of research on science and technology:

- Publication of 65 articles in national and international journals
- Publication of 10 books (individual authorship)
- Organization of 09 collective books (one of them bilingual: french and portuguese)
- Publication of 57 book chapters
- Production of new methodologies that support the teacher's performance in the classroom in the teaching arts: literature, dance, visual arts and music
- Production of scientific approaches in the treatment of aesthetic education at school
- New data production methodologies in the development of theses and dissertations like PEBA, artography and Discursive Textual Analysis
- Provision of services: work with teachers who participate in education networks in the Vale do Itajaí region (Santa Catarina/Brazil)

- Master's and Doctoral Guidance: 25 masters and 11 doctors - all professors working in basic education and higher education
- Production of strategic technologies related to the teaching of literature in digital media
- Creation of a "bebeteca" (a library specially elaborated for very young children from one month to five years of age) of the Early Child Education Center from the municipal teaching network of Itajaí, Santa Catarina
- Organization of scientific events promoting the meeting of researchers and disseminating scientific production
- Organization of cultural events promoting local production.
